Physical Location(s):

Florida Keys Mosquito Control Facility - Marathon

Basic Scope/Purpose:

The Pilot is responsible for aircraft flight planning, piloting, and record keeping including the following of rules and regulations governing the operation of District aircraft; safety, technical, medical and flight proficiency qualifications of pilots; and ensuring that the operation of District aircraft conforms with applicable Federal and State rules and policies as set forth by the District Board of Commissioners and administered by the Executive Director.

Reporting Responsibilities:

The Pilot reports to the Chief Pilot.

Working Conditions:

The Pilot will be required to pilot District aircraft at low altitudes over populated and congested areas and will be exposed to adverse environmental conditions, noise, vibration, close proximity to moving parts, working in high places, exposure to chemicals, fumes, odors, oils, and may be required to wear a respirator and/or other protective equipment.

Essential Functions (Without Accommodations):

2. Act as Pilot-in-Command for cross country IFR flights in the fixed wing aircraft as required. (Airplane)
3. Proficiency in the use of the Navigational and Application GPS systems.
4. Perform other duties as assigned.

Since our organization is going to change to meet the needs of public health, environmental conservation, and the District, you can expect, anticipate, and assume that your job description will change to meet these challenges.

Knowledge:

Knowledge of aircraft systems, performance capabilities, and operating procedures of the fixed wing and rotor wing aircraft assigned
Knowledge of aircraft navigation and navigational equipment
Knowledge of aviation meteorology and weather
Knowledge of FAA rules and regulations
Knowledge of mosquito control principles, practices, insecticides, and operations of aircraft equipment used for mosquito control aerial operations

**Abilities & Skills:**

Ability to safely operate the assigned aircraft at maximum performance levels at low altitude under adverse conditions

**Education, Training, & Experience:**

High school diploma or equivalent

Florida Keys Mosquito Control District is looking for Part Time and On-Call Pilots for Aerial Applications. Minimum hours are 1000 Total Time Helicopter with Turbine Experience. Commercial Pilots Certificate Rotary. Low level flight training and experience highly preferred. Must live within 1 hour drive of Marathon Airport. Must have or be able to obtain 2nd class medical certificate. Must be willing to obtain Public Health Aerial Applicators License upon hire.

Possession of a valid Florida Driver’s License

(Any or all of the above stated minimum requirements may be waived by the Chief Pilot if accepted by the District’s insurance company.)
