ITN 2025-03 REPLACE EXISTING ENTERPRISE MOSQUITO CONTROL & MANAGEMENT INFORMATION SYSTEM

QUESTIONS & ANSWERS

1. The RFP mentions a technical requirement for the "Database Integration" that says only Microsoft SQL server. Does this mean that the application has to forcibly run Microsoft SQL Server, or can we use other types of Relational databases i.e. MySQL, PostreSQL, etc. that we can then either export or integrate with a separate database?

   Yes, any technology that enables data integrity and security.

2. Will FKMCD be sourcing new hardware (tablets for inspectors, etc) as part of the rollout of this new application? If not, do we have the specs on the devices currently being used?

   Smartphone and computers.

3. GIS functionality can be attempted through a couple of methods: - What is your preference here

   a. Commercial - Basically paying for a license for ArcGIS and integrating directly - I think this is the current method you have with the solution being used.
   b. Open Source - We can use ArcGIS alternatives like GeoNode or others. If available and viable, would you be open to using an Open Source version?

   "B"

4. I understand that we are aiming to host this on a server. Will server be internal and on-premises or in the cloud?

   On-premises.

5. Would the FKMCD be looking to establish a recurring servicing and support contract with the company developing the site? If so, Should the suggested plan be added to the proposal sent?

   No support should be required. FKMCD plans to maintain the site ourselves.
